

Make your own Kraken pencil pal

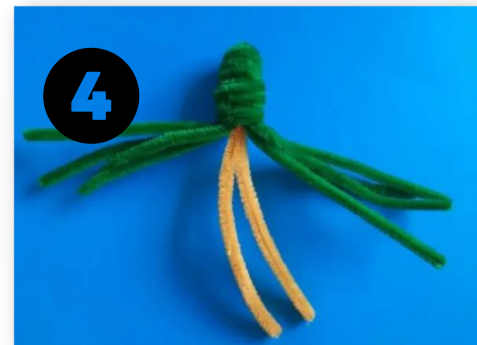

Take 4 pipe cleaners, line them up equally and fold them gently in half.

Bend the top 1 1/2 to 2cm of your arch down on itself.

Take another colored pipe cleaner and wrap it around the folded section.

Take a different color pipe cleaner and fold it in half. Push the folded part up inside the center of your Kraken. Take some more pipe cleaners and wrap them tightly around his head piece to thicken it up and secure the grip piece inside.

Push the pencil inside the kraken. Wind the grip tightly around your pencil. When you remove the pencil your grip piece should stay firmly inside.

Finish off by gluing on two googly eyes and shaping your tentacles. All that's left to do is attach him or her to your favorite pencil!
